REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a DSSS (direct sequence spread spectrum) receiver. The prior art discloses DSSS (direct sequence spread spectrum receiver but fails to disclose a receiver comprising; "at least one index section corresponding to the demodulating finger and having an output to supply indexing information for multiplexing the soft symbols output by the demodulating; wherein the demodulating finger has an input to receive the sample stream; and wherein the index section has an input to accept association parameters, and wherein the index section output supplies an index value for each soft symbol" along with the remaining limitations of claim 2. The prior art also fails to teach a receiver comprising; " a CPMS unit having an input to accept a CPMS signal and an output to supply a CPMS trigger signal in response to a modulation symbol being accumulated; and an accumulator having a first input to accept the accumulated CPSMS value, and second input to accept the CPMS trigger, and an output to supply an accumulation value in response to the CPMS trigger" as disclosed in claim 8. Nor does the prior art teach a receiver " wherein each index section has an output to supply a symbol index value for multiplexing the soft symbols output by its corresponding finger channel" along with the remaining limitations of claim 9. The prior art again fails to teach a method for indexing soft symbols comprising; "accepting association parameters includes accepting a code per modulation symbol (CSPMS) value" along with the remaining limitations of claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
